CLAIMS AGAINST CHILE

The Appointment of a New Commission Soon to Be Made.

The Many Cases Awaiting Settle ment-Senor Vicuna, the Minister, to Be in This City This Week-The Two Demands Against the United States to Be Carefully Considered.

The Claims Convention, ratifications of which will probably be exchanged this week by Secretary Hay and Senor Vicuna, the Chilean Minister, who is expected to reach this city in a day or two, revives the convention of August 7, 1892, for the purpose of adjudicating the claims which were duly presented to the Commission organized under the previous convention, but were not determined by that Commission because of the expiration of the six

months' limit set for its duration The convention of 1892 provided for the djustment of all claims of citizens, companies, or corporations of the one Government against the other, and it is stipulated that the proceedings of the Commission should be considered by the contracting parties as a full, final, and perfect settlement of any and every claim upon either Government, and that every such claim, whether or not the same may have been presented to the notice of or laid before the Commission, should be treated as finally settled, concluded, and barred.

Of the twenty-eight claims against the overnment of Chile, aggregating about \$26,000,000 in amount, presented to the evious Commission by the United States, the Commission found in favor of this Government in six cases, making awards amounting to \$240,500. Of the three claims of Chile against the United States, mounting to \$264,740, one claim was disnissed by the Commission.

When the life of the Commission expired ixteen claims of citizens of the United States against Chile, amounting to upward of \$9,000,000, and two claims of Chile against the United States, amounting to \$232,240, were left undisposed of. Nego tiations were opened by Mr. Olney with Senor Gana, the Chilean Minister here, which resulted in the signing of the convention reviving the former convention for the purpose above indicated. One of the largest claims against Chile, that of the North and South American Construction Company, has been directly adjusted between the Chilean Government and the

and Minnie came together near San Cle-mente Island, off the California coast, and the arms and ammunition were transferred to the Itala, which sailed at once for Chile. The United tSates had not at that time recognized the Congressionalist party as belligerents or otherwise. The Charles-ton was sent in pursuit of the Itata, but the She was been in pursuit of the toak, but character translater reached iquique, Chile, in safety. She was, however, delivered to the naval force of the United States lying at anchor in that port, and brought back to San Diego, where the ship was libeled in the United States District Court for violation of the neutrality laws. The court held that the evidence showed the only purpose of the Itata to be that of a storeship to transort the arms and ammunition to Chile to be used on shore by the insurgents, and hat none of the acts shown constituted an rming, fitting out or furnishing with the ntent to cruise against the established Government of Chile. The libel was accord-ngly dismissed, and this decision was

laim made before the Commission was for damages caused by the detention of the vessel, loss of use, etc. No consideration of Senator Clay. he case on its merits was had by the

By the terms of the new convention the commission is to have four months for the ransaction of its work, to be reckoned from the day of its first meeting for busiess, with the proviso that if this period is ness, with the proviso that it this period is sufficient for the settlement of the claims the Commission may at their discretion ex-tend the period one or two months more. The former Commission was composed of three members—John Goode, of Virginia, named by the President of the United States; Domingo Gans, named by the Presi-dent of Chile; and Alfred by the President of Chile; and Alfred De Claparede named by the President of the Swiss Confederation. George H. Shields was the agent and counsel of the United States, and Arthur W. Ferguson secretary. The personnel of the new Commission is not yet

An Increased Duty Which Will Affect Some American Exports.

The Typewriting Machine a Luxury in the Land of the Dons-Every Description of Electrical, Scientific, and Office Labor-Saving Device Classed Under a Heavy Rate.

Julius G. Lay, the United States Consul General to Barcelona, has written the State Department respecting the new Spanish tariff as follows:

"I wish to call the attention of our ex porters to the increased duties on a number of articles now exported from the were Mrs. Williams, Mrs. Eggleston, and United States to this country, as provided for in the new Spanish tariff which went into effect on January 1, 1900. These increased duties will seriously affect our exports of typewriters and, especially, oils.

"Typewriters in Spain are considered at present a luxury, and not a necessity. among business men; and although in time manufacturers, lawyers, and others will use them, still, of course, if the price is ncreased, so also will be the difficulty in introducing them, as none are made in this country.

"According to the new Spanish tariff, typewriters, which formerly paid (No. 268 of the old tariff) 24 pesetas per 100 kilograms plus 20 per cent war tax, or 29 pesetas per 100 kilograms (say, at current exchange, less than 2 cents per pound weight) are now dutiable at (289 new tar-

A rosy light was cast over the daintily appointed board by candles that burned under shades of red, capped with filigree silver.

The guests included the French Ambassador, the German Ambassador, the Russian Ambassador and Miss Cassini, the Chinese Minister and suite, the Secretary of State and Mrs. Hav. It is an advantage to our exporters to pay duty on the net, instead of the gross, weight of the oil, but the increased duty of 30 pessetas per 100 kilograms will entirely stop all importations of lubricating oils from the United States and seriously interfere with those of cylinder oils: and even if the riously interfere with those of cylinde oils; and even if the duty should be reduced to that now paid on British and Rus sian oils, we cannot compete with the veg etable oils."

SBARETTI TO DEPART SOON. The Bishop of Havana Will Leave for

Cuba Next Week.

Right Rev. Donatus Sharretti, Bisho Havana, Cuba, who was consecrated here at St. Aloysius' Church, on February 4, is still at the Papal Legation, with which he has been connected since 1893. He remarked yesterday that just seven years ago Pope Leo XII appointed him auditor of the legation, which was then created, with Mgr. Francis Satolli, Ambassador, or uncio, and Rev. Hector Papi, secretary For a year they resided at the Catholic University, but in 1894 the present buildng was secured, and has since been occu

The Bishop feelingly mentioned that he is the only one of the original members of the Legation remaining here, Mgr. Satoll having returned to Rome in October, 1896, after becoming a Cardinal in Baltimore, and Father Papi, having joined the Jesuit order in Frederick, Md., where he labored several years, but is now a professor at the great Jesuit seminary of Woodstock, Howard county, Md. After so lengthy a sojourn in this city Bishop Sharretti naturally has some reluctance in severing

the ties binding him to the Legation.

The Bishop said he did not seek the office and accepted it solely in obedinece to Pope Leo, whose friendship he has long enoyed. His immediate predecessor, Bishop Joyce. His immediate predecessor, Bishop Santander, is still in Havana acting as ad-ministrator of the diocese, pending B.shop Sbarretti's arrival. He will welcome and install his successor. Dr. Santander is a native of Spain, like

nost of the Bishops of Havana during the ast four centuries, and it was through his gency the dust of Columbus was recently xhumed from the vaults of its ancient athedral and transported to Sapin for final sepulture. Bishop Sharretti expects to leave this city for Havana early next week, and

will be accompanied by at least one promi-nent pastor of this city, who will remain at the Cuban capital long enough to wit-ness his formal enthronement in its cothe-dral. Neither Archbishop Martinelli por tev. Dr. Rooker will accompany him. The uestica of appointing his succe tion at the Legation will not be definitely ettled u.tl. after his departure.

As regards changes among the clergy at

Havana Dr. Sbarretti says that, knowing ttle or nothing about the see's presen or notating about the see's present condition evept from hearsay, he is unable to entitle his future plans further than to state that no changes whatever will be made unless circumstances, as yet unforeseet, justify them. There are upward of 250 clargy in the diocese of Harana and its cartelle resolutions. vana, and its Catholic population is large.
